Based in Lompoc, CA 93436

EDUCATION

California State University Channel Islands   *Graduated 05/2022*
B.S: Computer Science   **GPA:** 3.7

PROFESSIONAL SUMMARY

A software developer finding patterns to produce quality work on iOS, Android, and Windows Applications.

SKILLS

- C#, Objective C, Swift, SQL, SQLite, Kotlin, C, Java
- Consume SOAP, REST, XML Requests
- Databases: MySQL, MongoDB
- Android Studio, Xcode, Visual Studio, SAP GUI

PROFESSIONAL EXPERIENCE

iOS Developer - Haas Automation, Inc.   *04/2022-present*

- Main responsibilities include the maintenance of legacy Objective-C iOS applications, and the creation of new Swift based iOS Applications.
- On occasion I may work on WPF Windows applications, .NET web applications, or excel VBA macro files.

PERSONAL EXPERIENCE

F1 Calendar App - iOS Application   Github

- A UIKit, Model-View-Controller iOS application that hooks into the Ergast F1 API to display the F1 race calendar in similar fashion to the official F1 app.

Expense Management - Android Application   Github

- An Activity Based, Model-View-Viewmodel Android application that hooks into the Plaid API to poll user linked bank data and perform basic data visualization.

eBay Inventory Management - WPF Windows Application   Github

- A XAML based, Model-View-Viewmodel WPF Windows application that hooks into the eBay API to retrieve a user's "my selling" list. Stored in a local SQLite database to allow for basic inventory management.
